

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	24 June 2026
Team ID	SWTID-2026-5356
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Step-2: Brainstorm, Idea Listing and Grouping The agricultural sector generates a large amount of crop production data across different states, districts, seasons, and crop types. However, this data is difficult to analyze and interpret using traditional methods. The project aims to develop an interactive visualization dashboard that transforms raw agricultural data into meaningful insights, enabling users to analyze crop production trends, seasonal patterns, state-wise performance, and production distribution for better decision-making.

Step-2: Brainstorm, Idea Listing and Grouping

During brainstorming, several possible solutions were discussed.

Idea No	Proposed Idea	Advantages	Limitations
1	Develop a basic website displaying crop production information	Simple implementation	No interactive analytics
2	Create an Excel dashboard	Easy to build	Limited visualization capabilities
3	Build SQL database for crop production analysis	Efficient data storage and querying	Requires SQL knowledge
4	Develop Tableau Dashboard with Story	Interactive dashboards, filters, maps, and storytelling	Requires Tableau Public/Desktop
5	Build a Flask-based website embedding Tableau dashboards	Centralized platform with interactive visualizations	Requires web deployment

Step-3: Idea Prioritization

Proposed Solution	Importance	Feasibility	Priority
Data Cleaning and Integration	High	High	★★★★★
SQL Analysis	High	High	★★★★★
Tableau Interactive Dashboard	High	High	★★★★★
Tableau Story Creation	High	High	★★★★★
Charging Station Mapping	High	High	★★★★★
Brand & Range Analysis	High	High	★★★★★
Flask Website Integration	Medium	High	★★★★
GitHub Documentation	Medium	High	★★★★
