

Ideation Phase

Define the Problem Statements

Date	24 June 2026
Team ID	SWTID-2026-5356
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A farmer, agricultural officer, or student who wants to analyze crop production across different states and years.	Compare crop production, cultivated area, seasonal trends, and state-wise agricultural performance in one place.	The agricultural data is spread across multiple tables and is difficult to compare manually.	There is no single interactive platform that presents agricultural production data through meaningful visualizations.	Unable to identify high-performing crops, production trends, and regional differences efficiently.
PS-2	A researcher, policymaker, or data analyst studying India's agricultural production.	Analyze state-wise crop production, seasonal patterns, cultivated area, and long-term agricultural trends from 1997–2021.	The dataset is large, complex, and difficult to interpret using spreadsheets alone.	Traditional spreadsheets do not provide interactive dashboards, maps, or visual analytics for better decision-making.	Unable to quickly discover trends, compare states, and make data-driven agricultural planning decisions.
