

Responsive and Design of Dashboard Journey

Project Overview

Project Title	India's Agricultural Crop Production Analysis
Repository	Responsive and Design of Dashboard
Website	Flask web application with an embedded Tableau Dashboard and Tableau Story
Team Members	Mandula Mounika (Team Lead) • P. Bhuvana Nagalakshmi • Kovvuru Damayanthi • Pane Sathvika

Project Description

A total of 9 unique visualizations were created using Tableau to analyze India's agricultural crop production from 1997 to 2021. These include KPI cards, a line chart, an India map, horizontal and grouped bar charts, a donut chart, and a pie chart – all combined into a comprehensive interactive dashboard. The dashboard covers the following areas:

- KPI's-Total Production & Total Yield
- Trends of Agriculture Yield Analysis
- State-Wise Agriculture Production Distribution (India Map) Analysis
- Comparison of Cultivated area by crop Analysis
- State-Wise Cultivated Area Comparison Analysis
- Leading States by Agricultural Production Analysis
- Year-Wise Total Agricultural Production (1997-2021)
- Production Distribution by Unit Type Analysis
- Season-Wise Agricultural Production Share

To help farmers, researchers, and government officials understand agricultural production patterns and make better data-driven decisions.

Customer Persona

Primary User	Restaurant Manager
Age	35-45 years
Occupation	Agricultural Officer / Policy Maker
Experience	Uses agricultural data to monitor production trends and recommend farming strategies.

Goals

- Understand crop production trends.
- Compare crop production across states.
- Identify top-performing crops.
- Improve agricultural planning.
- Support government policy decisions.
- Increase productivity using data analysis.

Challenges

- Large amount of agricultural data.
- Difficult to compare multiple years.
- Climate affects production.
- Data is scattered across sources.
- Manual analysis consumes time.

CUSTOMER JOURNEY MAP

Dashboard Analytics Journey — Five Stages

Prepared as part of the Food Ordering Behaviour and Customer Trends capstone project.
