

Project Design Phase-II

Data Flow Diagram & User Stories

Date	9 July 2026
Team ID	SWTID-2026-5356
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Level 0 Context Diagram shows the high-level interaction of the system with external entities. It represents the entire India's Agricultural Crop Production Analysis (1997-2021) system as a single process.

Level 1 DFD breaks down the main process into sub-processes. It shows how data flows through different stages from collection to generating reports and dashboards.

Actor	Feature	User Story ID	User Story	Acceptance Criteria	Priority	Release (Sprint)
Farmer	KPI Dashboard	USN-1	As a Farmer, I want to view overall crop production KPIs so that I can quickly understand agricultural performance.	Dashboard displays total production, yield, area harvested, and crop count accurately.	High	Sprint-1
Farmer	Crop-wise Analysis	USN-2	As a Farmer, I want to compare crop production so I can choose suitable crops.	Crop comparison chart updates correctly when filters are applied.	High	Sprint-1
Farmer	Season-wise Analysis	USN-3	As a Farmer, I want to analyse seasonal production trends for better planning.	Seasonal charts display accurate production values.	Medium	Sprint-2
Farmer	State-wise Analysis	USN-4	As a Farmer, I want to compare crop production across states.	State-wise map/chart updates correctly.	High	Sprint-1
Farmer	Interactive Filters	USN-5	As a Farmer, I want filters by state, crop, and year.	Dashboard refreshes instantly with selected filters.	High	Sprint-1
Agricultural Officer	Yield Analysis	USN-6	As an Agricultural Officer, I want to analyse crop yield across states.	Yield charts accurately reflect filtered data.	High	Sprint-2
Agricultural Officer	Production Trend Analysis	USN-7	As an Agricultural Officer, I want to identify yearly production trends.	Line charts display yearly production correctly.	High	Sprint-2
Researcher	State-wise Comparison	USN-8	As a Researcher, I want to compare agricultural performance among states.	Comparison charts display correct state statistics.	Medium	Sprint-3
Researcher	Crop Category Analysis	USN-9	As a Researcher, I want to analyse different crop categories.	Crop category charts update dynamically.	Medium	Sprint-3
Policy Maker	Production Dashboard	USN-10	As a Policy Maker, I want to monitor agricultural production for planning.	Dashboard provides complete production summary.	High	Sprint-1
Policy Maker	Reports Export	USN-11	As a Policy Maker, I want to export reports for decision making.	Reports export successfully in PDF/Excel format.	Medium	Sprint-3
Decision Maker	KPI Dashboard	USN-12	As a Decision Maker, I want to monitor key agricultural indicators.	KPI cards load quickly with accurate values.	High	Sprint-1
Decision Maker	State Comparison	USN-13	As a Decision Maker, I want to compare states before making policies.	Comparative charts display selected states correctly.	Medium	Sprint-3

Actor	Feature	User Story ID	User Story	Acceptance Criteria	Priority	Release (Sprint)
Dashboard User	Tableau Dashboard	USN-14	As a Dashboard User, I want to interact with Tableau visualizations.	All charts and filters work properly.	High	Sprint-1
Dashboard User	Dashboard Navigation	USN-15	As a Dashboard User, I want easy navigation between dashboard pages.	Navigation works smoothly without errors.	Medium	Sprint-2
